# *About Us*

## **FACULTY OF ENGINEERING, CHRIST UNIVERSITY**

*Faculty of Engineering Christ University is situated far away from the hustle and bustle of the city. Situated on the Mysore road, a campus spread across over 80 acres makes sure that nothing interrupts this house of learning. Faculty of Engineering, though just started a few years back, has kept up with the momentum of the other engineering colleges across the country. The well-equipped laboratories, the workshops/seminars conducted, the remarkable faculty, the journals published, the research work being done, the partners the professors have claimed, the assorted library and the other state of the art facilities are a testimony to the same. While other additions like the bird's park, coconut grove, the spacious playgrounds, the Chapel, all let the students unwind after a long productive day at the campus.*

*The university believes in the holistic development of every individual and ensures that the students actively participate in social work and other activities. With all the state of the art facilities, it is no surprise that every engineering student is moulded well enough to face the challenges of the world with the right attitude.*

# *About Magnovite*

*Magnovite is the annual techno-cultural fest organised by the Faculty of Engineering, Christ University, Bengaluru, to be held on the 2nd, 3rd and 4th of March 2017. Magnovite 6.0 aims at encouraging scientific thinking, innovation, and knowledge of technology among the masses.*

*“Kreo,Beyond Infinity” the theme of Magnovite 6.0 is a translation of English word 'CREATION' in Esperanto language ,we are emphasizing on ‘Technological World’ ,evolution of technology in all disciplines .*

*Magnovite began in 2012 at The Faculty of Engineering Christ University with the principle of bringing together creative and technical energies, ideas and fundamentals in one fest, where participants can truly experience the coming together of two worlds. Since its humble beginnings, Magnovite has grown to a large fest almost exponentially, with Magnovite 2016 bringing in a footfall of over 2000 students from more than 90 colleges both within the state of Karnataka and beyond. As every year, the team behind Magnovite believes in pushing the boundaries on what a fest can mean to the participants and those backing it, and this year Magnovite is growing both laterally and vertically.*

*In the past, Magnovite has received sponsorships worth more than 10 lakhs which helped both MAGNOVITE and the sponsors to grow in their respective fields. We look forward in joining hands with sponsors this year and growing together as an organization.*
